SERIAL NO.: NEW APPLICATION

FILED: HEREWITH

FOR: DRIVING METHOD FOR FLAT-PANEL  
DISPLAY DEVICE

**STATEMENT OF RELEVANCY**

**References AO (3080053) on form PTO-1449:**

The document discloses a dot sequential driving method. According to this method, the potential of a signal line is precharged to an intermediate potential each time a video signal is switched. By virtue of this, a signal does not much vary, and the load exerted on a switching element is made as light as possible. Hence, degradation of the image quality of a displayed image is prevented even where small elements are used.

**References AP (3080054) on form PTO-1449:**

In the device disclosed in the document, the potential of a signal line is precharged to an intermediate potential each time a video signal is switched. By virtue of this, a signal does not much vary, and the load exerted on a switching element is made as light as possible. Hence, degradation of the image quality of a displayed image is prevented even where small elements are used.
